

# **WCISA® Member Directory & Product Listing 2025 Edition**

**WCISA®**

*Wire and Cable Industry  
Suppliers Association®*

**North American-based suppliers of  
machinery, materials and accessories  
for making all types of wire and cable.**

**WCISA® is a nonprofit trade association.**  
**[www.wcisaonline.org](http://www.wcisaonline.org)**

# WCISA®

Wire and Cable Industry  
Suppliers Association®

**WCISA® Members are North American-based suppliers of machinery, materials and accessories for making all types of wire and cable.**

[www.wcisaonline.org](http://www.wcisaonline.org) • [info@wcisaonline.org](mailto:info@wcisaonline.org)

1741 Akron Peninsula Rd. • Akron, OH 44313 USA • Tel 330 864-2122 • Fax 330 864-5298

## **WCISA's Mission:**

WCISA's mission is to promote its members' products and services by providing its members with promotion, representation, networking/social opportunities and services at domestic and international wire and cable trade shows and conferences.

## **WCISA Officers\***

- **Drew Richards, CEO, RichardsApex, Inc., WCISA President**
- **Rahul Sachdev, Executive Vice President, Wire & Plastic Machinery Corp., WCISA Immediate Past President**
- **Mike McNulty, VP & Editor, Wire & Cable Technology International, WCISA Executive Director**

## **WCISA Board of Directors\***

- **Paul Gemelli, Executive VP, Gem Gravure Co. Inc.**
- **Lance Hight, Sales Director, Chase Corporation**
- **Dave Kiddoo, CEO/Director, IWCS, Inc.**
- **Jay Luis, Director of Marketing, LaserLinc**
- **Jon Mello, Global Market Manager, Teknor Apex**
- **Gord Murray, Director, QED Wire Lines Inc.**
- **Jeff Swinchatt, Director of Sales and Marketing at The MGS Group - MGS Hall Northampton**
- **David Troy, VP Sales & Service at REELEX Packaging Solutions, Inc.**
- **Aaron Yaddow, Sales Account Manager, Carris Reels**
- **John Zachow, Vice President – Wire & Cable Systems, Davis-Standard Corp.**

**\*WCISA Officers also serve on the WCISA Board of Directors**

## **Membership: How to Become a WCISA Member Company:**

WCISA is a nonprofit, corporate membership organization of North American suppliers of machinery, materials and accessories used to make all types of wire and cable. Members are based in or have an established subsidiary in North America.

Prospective members should send an email to [info@wcisaonline.org](mailto:info@wcisaonline.org) to apply for membership: send Company Name, Address, Phone, fax, Key Contact Name, E-mail, Website and a 50-Word Description of your products and Services. The WCISA Board votes on all membership applications. Annual dues are US\$450 per member company.

## **WCISA Partners**

In pursuit of its mission, WCISA works with leading industry associations and organizations including the following:

- **IWCS Cable & Connectivity Industry Forum, [www.iwcs.org](http://www.iwcs.org).**
- **The International Wire & Machinery Association (IWMA), [www.iwma.org](http://www.iwma.org).**
- **Messe Düsseldorf North America, [www.mdna.com](http://www.mdna.com)**
- **The Wire Association International (WAI), [www.wirenet.org](http://www.wirenet.org).**
- **Wire & Cable Manufacturers Alliance, Inc. (WCMA, Inc.)**

Proposals for new and expanded relationships are welcome.

**ACCEL**

Accel International is a manufacturer of high-performance conductors, including silver-plated, nickel-plated and tin-plated copper and copper alloys for the wire and cable market. Accel operates vertically integrated factories with state-of-the-art technology in Connecticut, Indiana and Florida with approximately 650,000 square feet of manufacturing space and plans for future expansion. Serving the aerospace, medical, telecommunications and industrial markets have forged Accel's unwavering commitment to perfect quality of products. Accel produces the best quality products with investment in new technology and its associates. Practicing "Theory of Constraints" as the operational backbone has allowed Accel to provide the marketplace with fast and dependable delivery and better than 99% on-time delivered goods.

**AGC**  
AGC Chemicals Americas, Inc.

AGC Chemicals Americas, Inc. is a leading global supplier of high-quality fluoropolymer resins, custom compounds, fluoroelastomers and specialty chemicals and materials. Headquartered in Exton, PA that includes a state-of-the-art technology center, we maintain a manufacturing site in nearby Thorndale, PA as well as warehouses and distributors

throughout North America. We are the world's largest producer of ETFE and are also vertically integrated with PTFE and PFA under the brand name Fluon®. We can compound all melt processable resins and offer our Fluon+™ enhanced material science solutions for critical wire and cable applications in the following categories:

- Color concentrates
- Foam concentrates
- Laser-markable concentrates
- Cross-linkable compounds
- Conductive/anti-static compounds
- Reinforced compounds
- Lubricated compounds
- Flexible compounds
- Adhesive compounds

**AIM, Inc.**Headquarters: 14103 McCormick Drive,  
FL 33626 USAMidwest: 502 S. Vista Ave,  
Addison, IL 60101 USA

Phone 630 458 0008

Fax 630 458 0730

Web site: [www.AIMMachines.com](http://www.AIMMachines.com)

AIM Inc. manufactures 2D and 3D single and dual bending head machines complete wire CNC bending systems. All systems can expand to accommodate accessory machine modules such as chamfering, butt welding, end forming, drilling, marking, threading, and press operations. Many of these modules are available in-line, allowing for turn-key end-product manufacturing.

## **AITMAC, Inc. (Advanced Industrial Technologies and Machines, Incorporated)**

[www.kynar.com](http://www.kynar.com) [www.rilsan.com](http://www.rilsan.com)

For over 50 years, Kynar® polyvinylidene fluoride (PVDF) resin, a specialty thermoplastic fluoropolymer, has been used in applications that require high strength and purity. Known for its high purity, Kynar® PVDF resins also provide chemical resistance to acids and bases, abrasion resistance, flame retardancy, mechanical

strength, impact resistance, thermal stability and ease of processing - making it an ideal choice for wire and cable construction.

**Avient/Colorant Chromatics**

19 Francis J. Clarke Circle  
Bethel, CT 06801 USA  
Phone + 1 800 242 2296

Website:

[www.avient.com/colorant-chromatics](http://www.avient.com/colorant-chromatics)

Contact: Jamie Ginn, Regional Sales

Manager – North America

Cell: +1 609 412 7239

Colorant Chromatics is the world's leading specialist in the enhancement of high performance polymers, particularly Fluoropolymers. Colorant Chromatics was founded in Sweden in 1979 and started production of Fluoropolymer concentrates in the owner's barn. Since then, it has opened manufacturing plants in Aland, Finland (1981), in Bethel, CT, USA (1983) and Shanghai, China (2003) and a distribution center in Limburg, Germany (1985). In 2013, the Headquarters were relocated to Eindhoven, The Netherlands. Colorant Chromatics is a division of Avient Corporation, a premier provider of specialized polymer material, services and solutions.

**AW Machinery LLC**

Physical: 7 Just Road

Fairfield, NJ 07004

**AW MACHINERY**

AW Machinery LLC, purchased the engineering information (entire library of project files and designs) and inventory formerly owned by Viteck Inc. in 2003 and has since been providing a complete line of equipment for both plastic insulating, and, continuous cure CV insulation of wires and cables from Fiber Optic through Power Cables. Short deliveries for new components, wire line systems, complete technical service and spare parts for new and existing equipment presently in the field, is a specialty of AW Machinery. Some of the products manufactured by AW Machinery include:

Entire line of individual machines and complete extrusion lines (Plastic, CV & Fiber Optic)

- o Flyer Payoffs & Jackstands
- o Payoffs (Motorized / Drag Brake)
- o Take-ups
- o Cooling Troughs
- o Cooling Capstan Systems
- o Mist Boxes
- o Vertical & Horizontal Dancers
- o Tension Controllers & Tension Brakes
- o Load Cells
- o Capstans
- o Splice Boxes for CV Lines
- o Water Seals for CV Lines

**Aztech Lubricants LLC**

29047 State Highway 59

Wayne OK 73095 USA

Phone 405-310-0034

Tel.: (800) 272-8878, (760) 471-8949  
Contact: Peter Neville, President  
[www.bhtool.com](http://www.bhtool.com)

B&H Tool Company is a provider of innovative tooling solutions that improve the quality of extruded products and reduce scrap and set-up. For the international medical device industry, where B&H Tool is a leading supplier, the BH25A MicroCrosshead with Spiral Deflector is most newsworthy. This new tooling development is the industry's lowest volume microcrosshead, delivering breakthrough microextrusion performance for applications including microbore tubing, fiber optics, and insulated fine wire.

**Cable Components Group (CCG)**

185 South Broad St  
Pawcatuck, CT, 06379 USA  
Phone: +1 860 599 5877  
Fax: +1 860 599 5461

Website: [www.cablecomponents.com](http://www.cablecomponents.com)  
Contact: Charles Glew, President

Cable Components Group (CCG), founded in 1998, designs, engineers and manufactures extruded products for wire and cable, fiber optic cables and industrial non-wovens. CCG's 6-LAN™ crosswebs are foamed and include patented designs for Category 6, 6e and 6A LAN cables. CCG's FluoroFoam® is a patented chemical foaming agent of fluorinated ethylene propylene (FEP) or perfluoro methyl alkoxy (MFA) for use in insulations, tapes and

6-LAN crosswebs. Foamed fluorine-based products are particularly suited for the evolving Power over Ethernet (POE) or Power over LAN standards. These standards require materials with enhanced thermal stability, and foamed FEP or MFA insulation and jacketing offer an added safety margin for POE applications. For the POE standard from 0.5 AMPs to 1.0 AMP for Limited Power (LP), CCG offers these jacketing materials, as well as FluoroFoam insulation and crosswebs. 200°C-rated FluoroFoam FEP or MFA Jacket with FluoroFoam insulation and crossweb for 0.8, 0.9, and 1.0 AMP POE; 150°C-rated PVDF Limited Combustible Fluoro-Alloy Jacket with FluoroFoam insulation and crossweb for 0.6 and 0.7 AMP POE; 90°C-rated Low Smoke PVC Jacket with FluoroFoam insulation and crossweb for 0.5 AMP POE. All of these new materials are compounded by CCG in an effort to vertically integrate materials to service our customers with innovative, higher temperature-rated, fire retardant and foamable materials. CCG will use this compounding capability to service our in-house extrusion needs for crosswebs, tapes, tubes and monofilaments, as well as offer for sale these new foamable, as well as fire retardant compounds that are especially designed for copper wire and fiber optic cabling.

**Calmec Precision Limited**

Marc Fitzner, President

1400 Bonhill Road

Mississauga, ON, CANADA L5T 1L3

Phone &amp; Fax: 905-677-7976, 905-677-4766

Website: [www.calmec.com](http://www.calmec.com)

Established in 1979, CALMEC is a Canadian machinery manufacturer providing tailored Engineered Armouring Solutions. Calmec specializes in process driven equipment for the continuous roll forming of metallic strip, and the application of metallic and non-metallic tapes, to produce flexible conduit and pipes over electrical cables, hoses, and as compo-

nents of deep sea umbilical's.

Contact: Tom Maxwell

Die Quip is the leading manufacturer of die finishing equipment for tool and die shops around the world. Every machine has our trademark durability and accuracy features, which ensures long production life and easy access to spare parts. Our Die Saver line efficiently cuts time and guesswork out of die production. This group of machines have manual, semi-automatic and fully automatic cycles to cut, size and polish wire dies, bar dies, and tube dies. Each machine features a rigid base design with a powerful grinding spindle, angle setting gages and a zero stop to produce fast, accurate die geometry. The Die Flex line provides tremendous flexibility and accuracy to polish the angle and size the bearing with fully automatic or semi-automatic cycles. These machines have a search feature that finds the angle automatically before starting the cycle, which allows different die sizes to be run in the same group. Removable magazines allow dies to move from polishing cycles to sizing cycles without reloading. Full training packages, seminars, consultations and handbooks are available for easy operator training. We also provide specially formulated consumable supplies, die measuring systems and full lines of specialty cutters.

**Dundee Plastic Machinery Sales, Inc.**

4021 Yorkshire Ln.  
Northbrook, IL 60062 USA

Contact Moshe Laiser,  
National Sales Manager

Derek Olson, Director of Sales

Founded by Joseph Gemelli "the father of wire ID" in 1952, GEM Gravure's background in wire and cable manufacturing is what makes us the worldwide authority in wire and cable marking today. Our company values and innovative pursuits allow us to maintain strong relationships with the largest suppliers and manufacturers throughout the world. The first company to introduce ink jet technology to the wire and cable industry, GEM is now the exclusive distributor for KBA-Metronic ink jet marking equipment in the US, Canada and the borders of Mexico. A line of GEM designed/manufactured contact printing systems combined with the ink jet printers to provide a full range of wire identification options. GEM offers the widest range of ink jet inks specifically designed for wire & cable along with specialty inks for wire harness applications. GEM's research & development center in Nixa, MO is dedicated to developing unique inks from creation of pigment dispersions to final ink formulation. Controlling the entire process allows GEM to create the highest quality products. Gem Gravure has been family owned and operated since 1952.

Contact: Jeff Swinchatt or John Dudus

HALL Industries has been a part of The MGS Group since 1994. Hall Industries was founded in 1975 by Marcus Hall and became well renowned in the wire and cable industry over the years for engineered solutions for a variety of industry challenges. In October 1994, MGS Manufacturing Inc. of Rome, NY completed the purchase of substantially all of the assets of HALL Industries Inc., located in Branford, CT. The MGS Group maintains HALL Industries engineering excellence in our R&D/Service office in North Branford, CT. We continue to design and manufacture systems to handle most any product from sensitive optical fiber to 1000MCM power cable. We also can handle odd shapes; tubing, ribbon, tape, and armored products. Our Automatic and Semiautomatic Takeups are extremely reliable for on-line packaging of a wide range of products and reels at high speeds, resulting in significant cost savings. Our solid designs begin with robust steel frames, progress to include the most advanced recipe driven PLC controls, and are supported by qualified engineers and technicians who respond when a customer needs help. HALL products include Fully Automatic Packaging Systems with Robotic Depalletizer/Palletizer, Payoffs

and Takeups (Moveable Arm, Roll Thru, Cantilever Shaft, Multiple Spindles, Cone Pintle, Dual Semiautomatic And Automatic), Dancers, Vertical and Horizontal Accumulators, Capstans (Caterpillar, Belt Wrap, And Dual Drum), Fiber Optic Handling Systems, Rewinders, and Length Counters.

Many of our systems are versatile and can produce reels and/or coils, allowing the flexibility to respond to your customer needs with the same Takeup. Our success with Automatic Coiling Machines arrives from our flexibility allowing a range of products and coil sizes to be produced on the same machine. It also includes banding, shrink wrap, labeling, and palletizing. Our line of Fully Automatic Takeup systems, the FAT18 and most recently the FAT820 SFL Series has delivered the well-recognized MGS/Hall/Northampton reliability and flexibility to the application.

IWCS organizes the Cable & Connectivity Industry Forum as the premier technology event for the exchange of information about product, material and process innovation for cabling and connectivity solutions, and for the development of industry professionals through education and scholarships. IWCS is committed to strengthen its connectivity content and industry presence, providing interaction with technical and supply chain professionals on

the connectorization of cabling infrastructure. IWCS presents new content and promotes discussion of ideas and innovations to advance connectivity solutions. The IWCS Cable & Connectivity Industry Forum provides an opportunity to explore discussions on topical issues, learn about new technologies, and network with industry colleagues from around the world. Each year, the IWCS Symposium Committee generates an extremely high-caliber program for the Technical Symposium, which is the cornerstone of the Cable & Connectivity Industry Forum. Papers presented during the Technical Symposium remain publicly archived on the IWCS website to be referenced for ongoing research and education. The Annual Cable & Connectivity Industry Forum Includes The Following Event Components: TECHNICAL SYMPOSIUM, PROFESSIONAL DEVELOPMENT COURSES, EXECUTIVE TRACK, SUPPLIER EXHIBITION FEATURING NEW PRODUCT PRESENTATIONS, and PLENARY SESSION.

Northampton Machinery Co. is a long established business founded in 1902 in the town of Northampton in central England.

For the last 50 years Northampton has specialized in the design and manufacture of machinery and equipment for cable-making processes. Back in the 1950s we pioneered the development of the double twist process for very high speed stranding of electrical cables. Modern developments of the double twist technique still form the basis of most of the high speed twisting operation in cable-making, ranging from fine computer and data cable up to larger stranded power cable in aluminum or copper. Northampton products include Triple Twist 630mm, Double Twist 450 to 1600mm (72"), Single Twist 630 to 1250mm, Group Twinners, single twist technology, special planetary stranding, backtwisting for enhanced data cable twinning, payoffs, tension control devices, taping, binding, and many other rotating processes used in cable manufacture. Northampton Machine joined The MGS Group in 2003 further reflecting the group's commitment for well-engineered and supported products for the wire and cable industry. Northampton's latest machines have a performance that has enhanced our position as a leading supplier of high performance and quality machinery.

**Nylon Corporation of America (NYCOA)**

333 Sundial Ave  
Manchester, NH 03103 USA  
Phone 603-627-5150  
Fax 603-627-5154  
www.nycoa.net  
Monica Kumar, CFO

Operating for over 60 years, NYCOA manufactures specialty nylon resin used as the ULrequired nylon jacketing for building wire and cable. NYCOA supplies nylon to some of the industry's largest wire producers and has developed many innovative products for its customers changing needs.

Contact: Gord Murray

The Process Line Specialist. QED Wire Lines Inc. is a custom furnace manufacturer and engineering company specializing in process equipment for the steel wire industry. Our leading-edge furnaces are custom built for multi-strand annealing, stress relieving, patenting and tempering processes. With over 30 years of industry experience and innovation, we proudly serve customers in over 20 countries. Our patented equipment is backed by QED's renowned excellence in service; with commissioning and installation supervision as well as spare parts support, QED provides a complete package for processing wire. Our offerings include:

- Energy Efficient Fluidbeds: with rapid heat transfer resulting in significantly shorter furnace length and more compact process lines.
- Pulse-Firing Muffle Tube Furnaces: Benefits include improved thermal efficiency, increased temperature uniformity and

superior convective heat-transfer.

- Networked Panels with Remote Monitoring and Control: Programmed with user friendly software and advanced combustion algorithms, they deliver precise temperature control.
- Combustion Technology: Our patented system maintains a steady output with precise air-gas ratio on all our multiple burner furnaces.
- Industry leading Galvanizing & Galfan Coating: offering robust furnaces with new high efficiency recuperative immersion burners.
- Powerful Pre-Cleaning with Ultrasonics: incorporating new temperature and level control features with powerful ultrasonic transducers in combination with an innovative 4 stage suction wiping system.
- Patented Pickling: A proven performer, our HighTurbulence® Pickling System optimizes fluid flow turbulence to rapidly remove scale.
- High Efficiency Coat Weight Control: The innovative QED AutoCoat™ system ensures premium quality, high efficiency, and significant Zinc and Galfan® savings.

QED offers solutions for all steps in your process including: Heat Treatment, Wet Sections, Metal Coating, Wiping Systems, Spare Parts and Technical Services.

Reel Options by Vantor Corporation, established in 1972, is a leading manufacturer of plastic reels and spools. Engineered for superior product protection, reels can be shipped fully assembled or as KD components for local assembly and freight savings. Product line ranges from 6.5" utility spools to larger 23.75" plastic flanged reels, three-flanged reels as well as end stands for boxed reel applications.

**REELEX Packaging Solutions, Inc.**

Phone: +1 845 878 7878

Fax: +1 845 878 7884

Website: [www.REELEX.com](http://www.REELEX.com)

39 Jon Barrett Road

Patterson, NY 12563, USA

Contact: David Troy, VP Sales & Service

REELEX Packaging Solutions, Inc., formerly Windings, Inc. is the developer and licensor of The REELEX® System, and has been leading the way since 1957. REELEX is a patented method of winding cable or any cord-like product in such a way as to result in a reel-less, self-supporting coil. This unique coil dispenses from the inside out without twists, tangles, snags or overruns. The packages are easy to handle, stack and palletize, are far lighter than reels and spools and are 100% environmentally friendly. Sold under various brand names by the world's leading wire and cable manufacturers, REELEX has become the standard packaging system for "last-mile" lengths of LAN and Coaxial cable and is growing to be the preferred package for many other types of products like rope, building wire, plastic tubing, and more. REELEX Packaging Solutions, Inc. authorizes its customers to use its patented REELEX technology through a license agreement. The agreement provides royalties to be paid to REELEX Packaging Solutions, Inc. in exchange for the use of the patented technology. The agreement also guarantees that REELEX Packaging Solutions, Inc. will sell its REELEX coiling equipment to licensees at its own cost. This allows each licensee to be confident that it is engaging on a level playing field and that REELEX Packaging Solutions, Inc. is treating all its licensees equally and fully supporting them all. For more information on REELEX and our representatives in other countries please look to [www.REELEX.com](http://www.REELEX.com).

An advanced approach to design has made Tensor Machinery Ltd. a global leader and innovator in the wire, cable and fiber optic machinery industry, with customers in over 40 countries on five continents. We like to think of it as engineering designed to impress engineers. Driven by the principles of our founder, the late George Kepes, our 30 years of industry-leading innovation—combined with a customer-focused approach to manufacturing design and assembly—ensures we deliver the best, most reliable technical solutions for your specific needs. Our superior quality control and responsive service means faster commissioning and a worry-free customer experience. That worry-free experience starts with a thor-

ough understanding of your specific needs. Tensor Machinery then uses advanced design tools and the latest mechanical, electrical and electronic technology to ensure our equipment is engineered both to deliver to your specifications and to withstand the daily demands of high-volume production. Tensor is renowned for dependable equipment designs, and our unique in-house pre-testing process ensures your newly installed equipment is production ready within days.

When it comes to fiber optic or specialized copper wire manufacturing needs, Tensor offers a wide range of equipment and customized solutions: from individual components to complete turn-key manufacturing lines. Our products include UV Coloring lines, Ribbon Fiber manufacturing, SZ and Planetary Stranding, Pay-offs and Take-ups, Tape Armoring, Yarn Serving and complete Jacketing lines for indoor and outdoor cable products.

We invite you to learn more about how Tensor can exceed your expectations. For more information, contact Ken Luterbach, Director of Sales at [sales@tensormachinery.com](mailto:sales@tensormachinery.com).

Wire & Cable Manufacturers' Alliance (WCMA) is a non-profit business association serving the manufacturers of low to high-voltage electrical, electronic and fiber optic wire and cable with an established manufacturing base located in North America. Membership includes producers of signal and current-carrying wire and

fiber, producers of bulk cables and wire and cable processors and fabricators. Corporate membership of the above also includes industry suppliers, service providers, affiliated companies and organizations that support the cable manufacturing and processing industry. WCMA produces premier events that bring owners, executives and key managers together for networking, the exchange of information and to promote the wire and cable industry. The Wire & Cable Manufacturers Alliance was established in June 2004, as the successor organization to the Wire & Cable Clubs of America.

**Wire & Cable Technology International (WCTI)**

Zumbach offers a full line of on-line measuring, monitoring, and control instruments and systems including non contact diameter monitors/control systems, on-line capacitance monitors, control systems for cellular extrusion, eccentricity and wall thickness monitors (ultra-sonic or eddy current), OD/ID/Wall systems for cable jacketing or tubes, hollow profiles, X-ray wall thickness and eccentricity monitors for CV line applications, lump/neckdown detectors, wire preheaters, annealer control systems, spark testers, recorders, printers, and SPC/SQC data acquisition systems.

## WCISA® Scholarship Program

WCISA offers three types of scholarships to its member companies:

- WCISA Employee & Intern Scholarship** for people currently working at a WCISA member company. One or more awards per year. Applicants should have a need and desire to enroll in or be enrolled in an in-person or online course or degree program that is related to their job description at the WCISA member company. Applications are due from employees, interns or colleagues at WCISA member companies by July 31 of each year.
- WCISA High School Graduate Scholarship** for high school graduates with a parent or grandparent working at a WCISA member company. One or more awards per year. Applicants must be a high school graduate enrolled in a college or university in the fall of the application year. Any planned field of study is acceptable. Applications are due from students or parents/grandparents at WCISA member companies by July 31 of each year.
- WCISA Special Scholarship** for extraordinary or special circumstances, directly or via industry partners (memorials, hardships, research projects, endowments, etc.). These are awarded on a case-by-case basis. Applications or requests may be submitted at any time of the year by an employee of any WCISA member company or via industry partners.

Materials to Submit: Applicants should submit a written statement to [info@wcisaonline.org](mailto:info@wcisaonline.org), identifying their connection to a WCISA member company, the desired scholarship and the reasons to be selected

[www.wcisaonline.org](http://www.wcisaonline.org) • [info@wcisaonline.org](mailto:info@wcisaonline.org)

WCISA® member companies are North American-based suppliers of machinery, materials and accessories for making all types of wire and cable. Annual Dues: \$450/company. Established in 1996, WCISA is a nonprofit trade association.

## WCISA® Member Benefits

- COMPANY AND PRODUCT PROMOTION:** WCISA Member Directory and Product Guide published annually and distributed worldwide at trade shows and conferences in North America, Europe and Asia. WCISA web site, [www.wcisaonline.org](http://www.wcisaonline.org), containing member company and product information and hotlinks to member's e-mails and web sites. WCISA press releases published in wire and cable media outlets.
- REPRESENTATION AT TRADE SHOWS AND CONFERENCES:** WCISA exhibit booths. Literature distribution at shows. Pavilion sponsorships. Show services. Hospitality Events.
- NETWORKING AND SOCIAL OUTING OPPORTUNITIES:** At exhibitions and conferences.
- SCHOLARSHIPS FOR WCISA MEMBER COMPANIES:** Employees, Interns, High School Graduates, Special Circumstances.
- PARTNERSHIPS & DIALOGS WITH INDUSTRY ASSOCIATIONS AND EVENT ORGANIZERS:** IWCS, IWMA, MESSE DÜSSELDORF (GERMANY & NORTH AMERICA), VIAL.
- A UNIFIED VOICE & SUPPORT OF NORTH AMERICAN SUPPLIERS**

**SUPPORT THE INDUSTRY, YOUR COMPANY AND  
YOUR FELLOW NORTH AMERICAN SUPPLIERS  
IN THE WORLDWIDE MARKETPLACE**

RE: WCISA Awards 2024 Scholarships

The Wire and Cable Industry Suppliers Association (WCISA) is pleased to announce its annual scholarship award winners for 2024. The 2024 scholarship winners are listed below along with the WCISA Member Company they are associated with, either as an employee/intern or as a child or grandchild of an employee.

**WCISA 2024 High School Graduate Scholarship Winners:**

Erin Shows, Chase Corporation, \$750

Ethan Wasserman, IWCS, \$750

Juliette Silahian, Chase Corporation, \$750

Ahan Shi, Chase Corporation, \$500

Penelope Grapsas, AIM Inc., \$500

**WCISA 2024 Employee & Intern Scholarship Winners:**

Brandon Pepin, Chase Corporation, \$750

Theodor Kushylevski, Roteq Machinery Inc., \$750

The awards for each scholarship are to be used towards education expenses. The WCISA Board of Directors reviewed all applications and selected the winners. WCISA offers three types of scholarships, as follows:

- **WCISA High School Graduate Scholarship**, awarded annually to high school graduates with a parent or grandparent working at a WCISA member company.
- **WCISA Employee & Intern Scholarship**, awarded annually to WCISA company employees and interns.
- **WCISA Special Scholarship** for extraordinary circumstances, awarded on a case-by-case basis.

Congratulations to all the winners. The deadline to apply for the next round of WCISA scholarships is July 31, 2025.

**About the Wire and Cable Industry Suppliers Association (WCISA)**

*Established in 1996, WCISA is a nonprofit corporate membership association with over 100 North American suppliers of machinery, materials and accessories used for making all types of wire and cable. Members are based in or have an established subsidiary in North America. WCISA's mission is to promote its members' products and services by providing its members with representation, networking, social opportunities and services at wire and cable trade events and conferences. WCISA is active in wire and cable trade events and conferences throughout the world, in varying capacities, including as an exhibitor, supporter, sponsor and organizer. WCISA awards scholarships to employees and dependents of member companies as well as partner associations. Send membership inquiries to [info@wcisaonline.org](mailto:info@wcisaonline.org) and visit [www.wcisaonline.org](http://www.wcisaonline.org) to see the latest WCISA Member Directory, schedule of events and a list of WCISA partners.*

**Contact: Mike McNulty, WCISA Executive Director**

## WCISA's Outings in Atlanta & Düsseldorf

The **Wire and Cable Industry Suppliers Association® (WCISA®)** hosts a biannual networking and social outing in conjunction with its participation as an Industry Partner and Exhibitor at the *Interwire* trade show in Atlanta, GA, USA. “**WCISA Night Out in Atlanta**” is a free-of-charge event for all WCISA members, partners and their guests. It takes place the night before the exhibits open at **Der Biergarten**, close by the *Interwire* exhibit hall.

The next “WCISA Night Out in Atlanta” will take place on Monday, May 12, 2025, 6-8 PM. WCISA members can RSVP at [info@wcisaonline.org](mailto:info@wcisaonline.org)

WCISA also hosts a biannual “**WCISA Night Out In Germany**” networking outing in conjunction with its participation as a Supporter and Cosponsor of the *wire Düsseldorf* trade fair in Germany and its North American Pavilion. The outing takes place at **Brauhaus Joh. Albrecht** on the west side of the Rhein River.

The next “Night Out in Germany” takes place on April 12, 2026.

***Interested in Joining WCISA? Send an email to [info@wcisaonline.org](mailto:info@wcisaonline.org)***
