E-Mail: service@aversiontech.com

AVERSION TECHNOLOGIES, INC.

High Performance Repellent Masterbatches

Founded in 2005, Aversion Technologies is the only company in the world focused solely on repellent masterbatches. Our high-performance repellent masterbatches are in use worldwide to deter animals from damaging polymer-based products without causing physical or environmental harm. The standard products are based on EVA, EBA, PBT, and PE to serve the wire, cable, and compounding industries.

WCISA is a nonprofit corporate membership organization of North American suppliers of machinery, materials, and accessories used for making all types of wire and cable. Members are based in or have an established subsidiary in North America. WCISA's mission is to promote its members' products and services by providing member companies with representation, networking/social opportunities, and services at wire and cable trade events and conferences. WCISA is active, both as an exhibitor and supporter, in wire and cable trade events and conferences throughout the world. WCISA also offers three types of scholarships to its member companies
