Incorporated in 1992, OptEM Engineering Inc. is a privately owned computer-aided engineering (CAE) software and consulting services company specializing in the electromagnetic and signal integrity analysis of copper cables. The OptEM Cable Designer software reduces prototyping iterations and costs by allowing engineers to simulate the cable's electrical performance prior to prototyping and lab measurements. Engineers can also perform what-if experiments to investigate cable anomalies and material effects in new and existing cable designs. Customers are located worldwide and support is conducted from OptEM's head office located in Calgary, Canada, together with local distributors.

Technical Development Corporation (TDC) is an engineering and manufacturing firm founded in 1978. Products include optical fiber, wire and cable machinery. TDC's manufacturing machinery and equipment has been sold to plants across the globe in North and South America, Europe, Asia and Australia.

WCISA is a nonprofit corporate membership organization of North American suppliers of machinery, materials and accessories used for making all types of wire and cable. Members are based or have an established subsidiary in North America. WCISA's mission is to promote its member's products and services by providing member companies with representation, networking/social opportunities and services at wire and cable trade events and conferences. WCISA is active, both as an exhibitor and supporter, in wire and cable trade events and conferences throughout the world. WCISA also offers three types of scholarships to its member companies. Details and a member list can be found at www.wcisaonline.org.
